FOR IMMEDIATE RELEASE

SAMUDERA LAUNCHES KOREA-JAPAN SERVICE

Singapore, April 8, 2026 – **Samudera Shipping Line Ltd** (“**Samudera**” or the “**Company**”) has announced the launch of a new weekly container service connecting Japan and Korea, marking its entry into the Korea-Japan trade corridor and the extension of its intra-Asia footprint into Northeast Asia.

The Korea-Japan Shuttle (“**KJS**”) service will connect Nagoya and Kobe in Japan with Busan in South Korea, supporting demand for reliable feeder connections between the two markets. This service will commence in April 2026.

Bani Mulia, Group CEO, said, “The Korea-Japan trade lane is an active and important corridor and the launch of the KJS service aligns with our focus of building a resilient and responsive intra-Asia network. With committed cargo supporting this service, we will be able to deliver the schedule integrity and reliability that our customers expect of us. We will also monitor demand on this route as we assess opportunities for the longer term.”

The KJS service has been introduced on the back of customer demands, with committed cargo providing a strong base load for the service. Leveraging its track record as a longstanding feeder operator, Samudera offers customers a dependable alternative on an active trade route.

The new service reflects the Group's focus on expanding its intra-Asia network in a disciplined manner, in response to evolving customer requirements.
